

Enterprise Integration Platform (EIP)

Our EIP solution allows you to be agile and flexible with a light-weight, high performance system, enabling quick integrations and comprehensive interoperability among applications.

Get to market faster and reduce your total cost by self-serving and managing your third party integrations with your team, on your schedule. Our module helps to centralize and standardize integration practices across your entire infrastructure, freeing up your team to focus on your core business objectives, while reducing your total cost of ownership.

New revenue streams are part of your roadmap, with EIP, you can easily add third party partners to enhance your offering, attract more customers, and, ultimately, increase your revenue.

Key features

- **Comprehensive** — Lightweight, high performance, comprehensive solution that allows a local development team to instantiate external integrations at any time without requiring direct involvement with Telepin's development team.
- **API support** — Supports standard out-of-the-box APIs, multiple integration patterns and messaging related services, enabling interoperability among systems and business applications.
- **Dashboard analytics** — Provides an intuitive tool for a smooth experience in development and production deployments and the ability to incorporate specific analytics dashboards to gain better insights into system performance.

Financial Freedom. Anywhere.

- **Stable and scalable** — Able to handle a large number of integrations with a quick implementation and deployment time.

We understand mobile financial transactions better than any general value-added services infrastructure and have worked with many tier-one mobile operators around the globe. We apply this knowledge to deliver best-in-class solutions.

Our Mobile Financial Services address:

- Your need to differentiate and extend your communications network by offering new and differentiated services.
- Your subscribers' need for convenience and the ability to conduct financial transactions via their phone, giving them financial inclusion.
- Your merchants' desire to incorporate mobile commerce as a payment mechanism.
- Your concerns for security, privacy, and reliability.

Enterprise Integration Platform (EIP)

Technical Profile

Features and benefits

Vendor protocol support — Support for multiple integration patterns, enabling interoperability among various heterogeneous systems and business applications.

Intuitive tools — Intuitive, visually supported tools for a smooth experience in development environments and production deployments.

Dashboard analytics — Integration with business intelligence software tools for dashboard analytics, allowing better views into system performance.

At-a-glance analysis over multiple system functions, tracing message flows, for better visibility during development.

API sandbox monetization — Sandbox provided that can be used for up-sell purposes, introducing various developer registration packages such as Bronze/Silver/Gold packages.

Each package offers different access to functionalities in the EIP.
